PROFESSIONAL SUMMARY

Integration & Middleware Specialist with **8+ years of experience** architecting and deploying healthcare IT solutions across **50+ hospital clients** in Indonesia. Specialized in **HL7, FHIR R4, SatuSehat, and BPJS** integrations, with a strong foundation in .NET, React, and multi-vendor interoperability design.

WORK EXPERIENCE

PT. Quantum Infra Solusindo · 2017 — Present

Lead of Intercon — Integration & Connectivity 2024 — Present
Leading integration platform strategy & delivery

Research & Developer — Innovation Division 2020 — 2024
R&D focus on healthcare interoperability innovation

Research & Developer 2017 — 2020
Core middleware and integration development

KEY ACHIEVEMENTS

- Delivered integrations with **5 LIS vendors** and **8 RIS vendors** across diverse hospital environments
- Architected and deployed on-premise middleware solutions across **50+ hospital clients** throughout Indonesia
- Led end-to-end integration with **SatuSehat/FHIR R4** and **BPJS** ensuring regulatory compliance at scale
- Designed multi-vendor interoperability middleware bridging third-party platforms, government systems, and BUMN infrastructure
- Integrated **medical IoT devices** including smart infusion pumps and vital sign monitoring equipment into hospital middleware ecosystem
- Extended platform connectivity to **digital health channels and payment infrastructure**, covering queue systems, web registration, mobile applications, WhatsApp Business API (WABA), and payment gateways

PROJECT PORTFOLIO

Intercon Console

On-premise healthcare integration management console with BFF architecture, SSO, SatuSehat/BPJS/HL7 integration, RBAC, and real-time monitoring across multiple hospital clients.

React

Vite

ASP.NET Core 8

SQL Server

SatuSehat

BPJS

HL7

SignalR

DICOM Gateway

WinForms DICOM gateway for SatuSehat radiology integration, handling DICOM SCP/SCU, tag editing, worklist management, and FHIR R4 ImagingStudy resource submission.

C#

WinForms

DICOM

FHIR R4

SatuSehat

MedinfrasEDC Service

.NET 8 Worker Service bridging BCA EDC devices over TCP/Serial with binary ECR protocol parsing for hospital payment integration.

.NET 8

Worker Service

TCP/Serial

ECR Protocol

Direct Printing Service

.NET 8 Worker Service for direct hospital document printing with Inno Setup multi-instance installer and WinForms tray notification client.

.NET 8

Worker Service

WinForms

Inno Setup

Sistem Antrian Admisi

Hospital admission queue management system with QZ Tray integration for direct ticket printing, session management, and IIS deployment across hospital client sites.

ASP.NET Core 8

SQL Server

QZ Tray

IIS

API Consumer Management

Centralized API consumer management system with HMAC-SHA256 authentication and role-based access control (RBAC) using a DelegatingHandler pattern.

ASP.NET Web API 2

.NET 4.6

HMAC-SHA256

RBAC

AREAS OF EXPERTISE

Healthcare Interoperability

- SatuSehat / FHIR R4 resource mapping
- BPJS claims & eligibility integration
- HL7 MLLP message processing
- DICOM radiology workflow
- Medical IoT device integration

Integration Architecture

- On-premise middleware design
- Multi-vendor LIS/RIS integration
- BFF & API gateway patterns
- Real-time event-driven systems
- WABA & payment gateway integration

Security & Deployment

- JWT/SSO & HMAC-SHA256 auth
- RBAC & multi-tenant architecture
- IIS deployment & Windows Services
- SQL Server optimization
